

JOIN OUR TEAM!!

# Design Engineer

**We are looking for an experienced Design Engineer to join our innovative, fast-growing company.**

You'll be a member of our brilliant team, contributing to the design and development of specialty fixtures and wall systems utilized in retail environments. To be successful in this position, you should have hands-on experience using CAD software, with strong attention to detail and a creative flair. It's also important that you have rock-solid project management skills to meet the daily demands of the role.

At revolv+ we are team oriented and know during any given project; team work really does make the dream work. If you fit this description and you are enthusiastic about our company and its products, let's meet!

## **Responsibilities +**

- Design fixtures from scratch or base concept
- Craft models and drawings using CAD [SolidWorks + 20/20]
- Manage and edit existing engineering files
- Prep files for sales presentations, marketing, and production
- Find creative design solutions to problems
- Improve existing designs and processes
- Research new product ideas, methods, and materials for cost-effectiveness
- Have knowledge of production and material estimating as well as vendor management
- Ensure compliance with the industry's safety standards
- Ensure designs are user- and environment-friendly [Universal Design + Sustainability]
- Maintain accurate records and detailed reports for all projects
- Present designs to team as well as new and existing customers

## **Requirements & Core Competencies +**

- Previous experience as a Design Engineer or a similar role
- Proven experience using CAD; knowledge of SolidWorks is preferred, 20/20 is a plus
- Good understanding of safety standards and environmental impact of a design
- Ability to present in front of team members and stakeholders
- Great computational and spatial ability with a thorough understanding of construction
- Excellent oral and written communication
- Proficient in Microsoft office.
- Task oriented with attention to detail as timelines are critical to successful projects
- Self-motivated and confidence with decision making
- Degree in Mechanical Engineering or demonstration of experience in a similar field

Salary range of \$60K++ pending experience.

revolv+ provides vacation and medical benefits as well as a 401K match.

Opportunities for further education is encouraged and provided with this role.
